Can I use AI for this?

A one-page guide for staff. It does not replace the AI Acceptable Use Policy; it gets you to the right paragraph of it.

Start here

1. What is the classification of the material you want to put in?

Look at the label on the document or the folder. If there is no label, treat it as Internal. If it names a person and says something about them, treat it as Confidential whatever the label says.

- **Public**: go to 2.
- **Internal**: go to 3.
- **Confidential**: **stop**. You may not use any AI tool with this material. If you believe there is a strong case, speak to the Data Protection Officer about a Data Protection Impact Assessment. Do not start without one.

2. Public material

You may use any tool. You are still responsible for the output. Check it. Go to 5.

3. Internal material: is the tool on the Approved Digital Tools List?

- **Yes** (at present, Cloudi): go to 4.
- **No**: **stop**. Use the approved tool instead, or do the task without AI.

4. Does the task involve a decision about a person?

Admissions, progression, award, disciplinary, fitness to practise, recruitment, grievance, reference.

- **Yes**: the tool may help you draft or summarise, but the decision, and the reasons for it, must be yours and must be recorded as yours. Go to 5.
- **No**: go to 5.

5. Before you rely on the output

- Check every name, date, figure and quotation against the source.
- Check that nothing has been attributed to the wrong person.
- Check that nothing has been left out that matters.
- If the output will be read by others, note that AI was used and who checked it.

Quick answers

I want to...	Answer
Turn a meeting transcript into draft minutes	Yes, with Cloudi, if the meeting had no reserved or confidential items. A named person finalises.
Summarise a Council pack for the Dean	Yes, with Cloudi. Check the summary against the pack.
Pull provider details out of thirty letters into a table	Yes, with Cloudi. Check a sample of rows against the letters.
Tidy up a reference I am writing for a student	**No.** References are Confidential and about a person.

I want to...	Answer
Check the grammar in an applicant's personal statement	**No.** Applicant records are Confidential. Not in any tool.
Draft a student-facing guide from the regulations	Yes, with any tool: the regulations are Public. Check it against the regulation.
Analyse the awarding gap by programme	Yes, with Cloudi, using the aggregated extracts from Planning and Insight. Not the individual-level data.
Write a difficult email to a colleague	Yes, with Cloudi, as long as you do not paste in Confidential material about anyone. Then read it as the recipient.

Who to ask

Classification and data protection: Information Governance Manager, extension 2010. Tools and access: Digital Services, extension 5000.
